Dexter **EXPRESS** Stack Dryers

Dexter's new EXPRESS 50lb Big Stack™ model joins our EXPRESS 30lb model and gives coin laundry owners capacity and performance that no other stack dryer can match.

With a long-standing reputation for having the best performing, and most reliable stack dryer on the market, Dexter's newest model takes the industry to a whole new level of capacity, while still delivering the drying performance and energy efficiency that Dexter is famous for.

Both sizes of Dexter EXPRESS stack dryers are perfectly tuned to maximize drying performance and energy efficiency. By balancing heat input, tumble speed, air recirculation, and airflow through our fully-perforated, large-diameter cylinders, Dexter dryers deliver maximum energy efficiency and superior drying speed. And the added flexibility of multiple sizes allows stores to not only increase their drying capacity, but also to better match washer sizes with dryer sizes – a real convenience for customers.

In today's competitive market, if you're looking for a way to grow your business without adding additional floor space to your laundry, Dexter stack dryers are for you. Your local Dexter authorized distributor can show you how replacing your existing dryers with new Dexter stacks will improve your profits and return on investment.
