Duncan Fabricating Company, Inc. has almost 50 years experience in building Commercial Appliance Outlet Centers. These units are a complete appliance outlet package designed for ease of installation, durability, and a clean, custom look.

We carry a UL listing and the entire electrical system is wired according to the National Electrical Code. The water supply and drain systems will be built to comply with all major plumbing codes as well as state and local variations of these codes.

### **Each Unit:**

---

- Can be depreciated just as other laundry equipment.
- Carries a serial number and can be financed
- Is factory tested and guaranteed against defects in materials and workmanship for one year.
- Can usually be built and shipped within 10-15 working days of a firm order
