Laundry Logic Management System Professional Edition Software

VTM Setup Utilities:

Software is used to establish award values, soft key values, card price with multi-bill card purchase, maximum revalue, Spanish Display prompts Enable and Disable, and various accounting functions.

The Professional Edition has these additional features:

- User can create audit adjustments from the software
- User can view audits from audit cards including CardSlide audits, VTM audits and user can make Audit Adjustments.
- This Edition has database compression to save room on the user's hard drive.
- This Edition has a Backup and Restore feature to protect user's data in case of hardware failure.
- This Edition has a machine database import utility for future equipment upgrades.
- This Edition has the ability to import the Database from previous versions to retain all user transactions
- This Edition will retain a machine list that will identify all machines at every location.
This Edition will retain all information from each location.

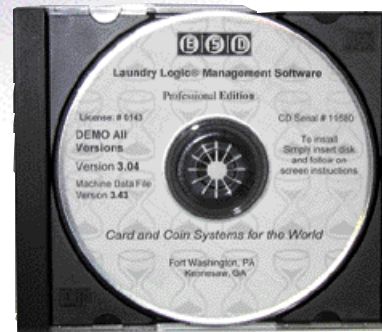

The LLMS Professional Edition software was designed for the multi-site owner. It offers functions needed to review information about a single site or multiple sites. In addition to the features of the Basic Editions, the Professional Edition includes numerous reports that display complete usage and revenue data.

View and Tool Options

- The Professional Edition offers the choice of a grid layout or a visual representation layout to list and identify all machines in a single location. The visual layout allows the user to mirror machine placement of the actual location
- User has the ability to change Management and Attendant Passwords at any time.
- User has the ability to enter location information including, Location Name, Contact, Phone, and Address.
- User has the ability to view the information on a MoneyCard, a Setup Card, or a Management card.
- This Edition has tool bar icons that allow for easier flow from one function to another.
- Multiple locations can be added or deleted as needed.

CardSlide Setup Utilities:

- Software is used to set the Cycle Price, Cycle Time, and Special Information such as Daily Special's and Class Special's for the CardSlides on all Machines.

Laundry Logic Management System Network Edition Software

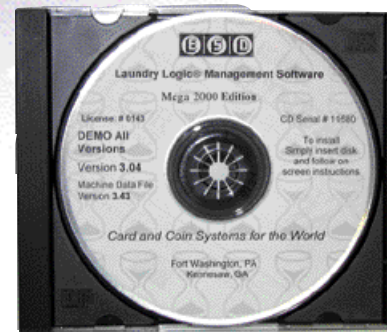

Additional Features Include:

- Password protection for security.
- Customer database with full name, address, area, card serial number and card class.
- Customer database viewer that displays all customer data, including location used and card activity
- Customer Database searches either manually or by MoneyCard serial number.
- A View New Transactions function that allows the user to see only new card transaction and event information.
- The ability to view transactions and events for specified time periods and for each site or all sites.
- The ability to view the Transaction Table to access specific information on each VTM, each customer, transaction details, event details and transaction summary details.
- The ability to search the Event Table for Status Events such as incorrect setups, password rejections and card dispenser empty / stuck.
- The ability to archive transactions from previous time periods for record keeping.

The LLMS® Network Edition software was designed for the multi-site owner who desires remote access to information. The Network Edition includes all of the features of the Professional Edition, but in addition the principal component of the Network Edition is the ability to access any user location remotely and retrieve real time information about that location.

Remote Access Capability

- The Network Controller allows the remote access to the Mega 2000 VTM through a modem and a phone line.
- The remote user can
 - Download all transactions at each location.
 - Download all audits at each location.
 - Check the status of all machines on the network.
 - Set the time on the VTM.
 - Initialize or change the setup of the VTM.
 - Retrieve each VTM's setup.
 - View each VTM's Audit table
 - Enable a Card Dispenser Flag at a user-specified amount to monitor card sales and audits.
 - Enable Stack Almost Full flag to know when the VTM's are getting full of bills.
 - Setup software to automatically download all transactions and audits from all locations for up to minute account records.
